sewer. To do so it will be only necessary to go back on the present drain pipe to get the necessary fall and put a reducer on the 6 inch pipe and continue a four inch pipe to connection with the City Sewer. This could not injure the City in any way and would save me some expense I ask this because the connection is only temporary as I intend to build on the site of the old Central as the present lease expires.

El Paso Texas June 7th 1889.

To the Chairman of the Acequia Comn

Sir,

I have the honor to report that the assessments for Acequia tax made by me thus far will amount to nearly $700.00 This does not include fees on unimproved property of the Campbell Real Est Co. El Paso Building & Loan Association, nor water used for domestic purposes. I have thus far collected $106.75. $66.00 of which is still in my possession and which will be turned over to the City Assessor & Colr as soon as he can be found at is office to morrow morning. I will further state that the main Acequia is in fair order, and that all patrons have an ample supply of water, this can not be said about the 4th St Acequia. it will not hold the desired amount of water and runs over on Second Street. It is

badly in need of cleaning out from 2nd to Hills St at several places also bridges are badly needed. in conclusion I would recommend that the Acequia on Florence and San Antonio Streets be covered with lumber as children are very apt to fall into it. and if they do they will surely be drowned.
