HOT CARS KILLS PETS!!

Even 10 minutes could be too long for a dog or cat left in a parked car on a hot El Paso day. By then, the temperature inside the car could reach 160 degrees and that's hot enough to cause the pet to suffer heat stroke. Within moments, it could suffer permanent *brain damage*.

If emergency care is not given, the pet could DIE.

The short stop you plan to make at the store could stretch to 15 minutes or more before you know it. Your mistake could cost your dog or cat its life! Leaving the windows cracked won't cool the car enough to protect your pet!

Although you and your pet would like to be together during the Hot Summer El Paso months, it's much *kinder* and *safer* to leave your pet at home with plenty of shade and cool drinking water!

If you see an animal in a car during a hot day please report it immediately! YOU COULD BE SAVING A LIFE!
