TEXAS LAW

Several Texas Laws (Health & Safety Code, Chapters 81, 84, and 87; Texas Administrative Code Title 25, Chapter 97) require anyone involved in the care of individuals to report specific information regarding notifiable conditions to local or state health departments (City of El Paso Department of Public Health or Texas Department of State Health Services).

All health care providers, clinics, hospitals, laboratories, schools, child day care centers and other relevant entities must report information on anyone suspected or confirmed of having a notifiable condition. Failure to report is a Class B misdemeanor that carries a sentence of up to 180 days and a fine of up to \$2000

HIPPA

The Health Insurance Portability and Accountability Act (HIPAA) allows a covered entity to disclose protected health information without the written authorization of the individual, for public health activities and purposes, to a public health authority that is authorized by law to collect or receive such information for the purpose of preventing or controlling disease, injury or disability. And for the purpose of conducting public health surveillance, investigations and interventions. reporting without authorization for public health purposes and where required by law. (45 C.F.R. § 164.512(b)(1)(ii))
