# City Council Approves Airport's \$316 Million Capital Improvement Plan

**EL PASO, Texas**—The El Paso City Council has approved the El Paso International Airport's (EPIA) Fiscal Year 2025-2030 Capital Improvement Plan (CIP), a \$316 million investment designed to strengthen the region's air transportation infrastructure, expand economic opportunities, and enhance the passenger experience.

The five-year plan includes more than \$160 million in airfield safety and efficiency projects, \$77 million in terminal upgrades, and \$78 million in non-aeronautical developments aimed at diversifying airport revenue streams.

"This plan reflects our continued commitment to making smart, forward-looking investments that support regional growth and improve the experience for travelers, tenants, and businesses," said City Manager Dionne Mack. "Through strong planning and collaboration with our federal partners, El Paso International Airport is positioning itself as a key driver of economic development for the entire border region."

## Strategic Investment and Funding Partnerships

The approved plan leverages a mix of local and federal funding sources, including:

- \$131 million from the Federal Aviation Administration through the Airport Improvement Program, Discretionary and Supplemental Funding, and the Bipartisan Infrastructure Law.
- \$100 million in Airport Enterprise funds.
- \$27 million in grants from the Department of Energy, Economic Development Administration, and Texas Commission on Environmental Quality.
- Additional contributions from the Passenger Facility Charge, Customer Facility Charge, and Tax Increment Reinvestment Zone (TIRZ) #14.

## Major Projects

Key ongoing and planned projects include:

- Airfield Improvements: Enhancing safety and operational efficiency through pavement reconstruction, taxiway realignments, and ramp rehabilitation projects.
- Terminal Modernization: Continuing multi-phase improvements that include lighting, ceiling, and accessibility upgrades, as well as future terminal restroom renovations and interior wayfinding enhancements.
- Sustainability Initiatives: Adding solar-covered parking, electric shuttle vehicles, and a new Airport Sustainability Master Plan to guide long-term environmental progress.
- Advanced Manufacturing District: Launching the Build Back Better-funded 250-acre campus that will support new industrial and aviation-related development.

The Airport currently manages \$130 million in state and federal grants and continues to proactively prepare shovel-ready projects to remain competitive for additional funding opportunities.

**About El Paso International Airport**

EPIA serves approximately 4 million passengers annually and operates as a critical gateway for domestic and international travel, air cargo, and regional business development. Through its strategic investments and partnerships, the Airport plays a central role in advancing El Paso's position as a hub for trade, logistics, and innovation.
