Fight the Bite:

The Four D’s

**DRAIN** standing water around the house weekly since it’s where mosquitoes lay eggs, including: tires, cans, flowerpots, clogged rain gutters, rain barrels, toys and puddles.

**DUSK & DAWN** are when mosquitoes that carry the virus are most active, so limit outdoor activities or take precautions to prevent mosquito bites.

**DEET** is an effective ingredient to look for in insect repellents. Always follow label instructions carefully.

**DRESS** in long sleeves and pants during dawn and dusk or in areas where mosquitoes are active.

West Nile Virus disease is rare, but if you have symptoms including high fever, severe headache and stiff neck, contact your health care provider immediately.
